

**OPEN POSITION: Environmental Managing Engineer**

**JOB CODE: ENV-ME-04-21**

**OFFICE LOCATION: Lincoln, RI**

**POSITION SUMMARY:**

Pare Corporation has a position available for an Environmental Managing Engineer with 15+ years of experience in water supply and/or wastewater-related engineering. Water and wastewater treatment experience is a plus, but not required. This position applies extensive knowledge of principles and practices to a broad range of assignments and projects to support and/or manage a major project or several projects of moderate scope with complex features. The ideal candidate will have very strong project management skills and technical capabilities. Public outreach, including comfort with public presentations, business development and a demonstrated history of client relations is a plus.

**DUTIES AND CORE RESPONSIBILITIES:**

- Perform and/or supervise environmental engineering projects in the fields of water supply and wastewater collection. This may include directing the work of engineers, technicians, administrative staff, and subcontractors in a multi-disciplined team environment.
- Review and/or prepare environmental engineering reports, progress reports, contract documents, and other project documents.
- Develop/research new techniques and/or improved processes, materials, or products.
- Prepare progress reports, schedules and budgets for ongoing projects.
- Prepare scope, staffing estimates, progress reports, schedules and budgets for proposals.
- Attend and present at interviews, project meetings and community outreach presentations.
- Represent the firm in the community, professional organizations, and at events.
- Assist in staff hiring and performance evaluations.
- Other related activities as needed and assigned.

**EDUCATION, EXPERIENCE, AND COMPETENCIES:**

- Registered Professional Engineer license required.
- Bachelor's degree in engineering from an ABET/EAC accredited program; master's degree or equivalent preferred.
- In-depth knowledge of environmental and water/wastewater design and engaged in life-long learning to maintain knowledge of contemporary issues.
- 15+ years of experience in water supply and/or wastewater-related engineering.
- Experience with staff management, project management, public presentations, business development, and client relations.
- Experience in preparation of Construction Documents (i.e. plans and specifications) required.
- Experience with hydraulic modeling for both water and wastewater systems strongly preferred.
- Must be able to communicate effectively using verbal, written, and interpersonal communication skills to internal and external audiences.
- Attention to detail and the ability to think critically.
- Self-motivated with a professional attitude.
- Active participation in professional and/or community organizations.
- Service-oriented approach to client management and willingness to act as a mentor for junior-level staff preferred.

---

Pare Corporation offers a solid compensation and benefits plan including:

- Competitive Salaries
- Paid Holidays and Vacations
- Health, Dental, Vision, Life/AD&D, and Long-Term Disability Insurance
- 401(k) Retirement Plan with Competitive Company Match
