

OPEN POSITION: Managing or Senior Project Level Environmental Engineer

JOB CODE: ENV-SPE-01-04-20

OFFICE LOCATION: Lincoln, RI

POSITION SUMMARY:

Pare Corporation has a position available for a Managing or Senior Project Level Environmental Engineer with 10+ years of experience in water supply and/or wastewater-related engineering. Water and wastewater treatment experience is a plus. This position applies extensive knowledge of principles and practices to a broad range of assignments and projects to support and/or manage a major project or several projects of moderate scope with complex features. The ideal candidate will have experience in project management, client management, proposal development and business development, and significant experience with hydraulic modeling, CAD, GIS, and the preparation of construction documents.

DUTIES AND CORE RESPONSIBILITIES:

- Perform and/or supervise environmental engineering projects in the fields of water supply and wastewater collection. This may include directing the work of engineers, technicians, administrative staff, and subcontractors in a multi-disciplined team environment.
- Review and/or prepare environmental engineering reports, progress reports, contract documents, and other project documents.
- Develop/research new techniques and/or improved processes, materials, or products.
- Prepare progress reports, schedules and budgets for ongoing projects.
- Prepare scope, staffing estimates, progress reports, schedules and budgets for proposals.
- Attend and present at interviews, project meetings and community outreach presentations.
- Assist in contract negotiations.
- Participate in business development plan implementation.
- Represent the firm in the community and professional organizations and events.
- Assist in staff hiring and performance evaluations.
- Other related activities as needed.

EDUCATION, EXPERIENCE, AND COMPETENCIES:

- Registered Professional Engineer preferred or the ability to become one within a year of start date required.
- Bachelor's degree in engineering from an ABET/EAC accredited program; master's degree or equivalent preferred.
- In-depth knowledge of environmental and water/wastewater design and engaged in life-long learning to maintain knowledge of contemporary issues.
- 10+ years of experience in water supply and/or wastewater-related engineering.
- AutoCAD and GIS capabilities strongly preferred.
- Hydraulic modeling for both water and wastewater systems strongly preferred.
- Experience in preparation of Construction Documents (i.e. plans and specifications) required.
- Must be able to communicate effectively using verbal, written, and interpersonal communication skills to internal and external audiences.
- Attention to detail and the ability to think critically.
- Self-motivated with a professional attitude.
- Active participation in professional and/or community organizations, with leadership roles especially at a local level preferred.
- Experience with staff management, project management, and business development.
- Service-oriented approach to client management and willingness to act as a mentor for lower-level employees preferred

Pare Corporation offers a solid compensation and benefits plan including:

- Competitive Salaries
- Paid Holidays and Vacations
- Health, Dental, Vision, Life, and Long-Term Disability Insurance
- 401(k) Retirement Plan with Competitive Company Match
- Tuition Reimbursement
- Professional Registrations, Licensing Fees and Memberships

Pare Corporation is an equal opportunity employer and maintains a policy of affirmative action for minorities and women, individuals with disabilities, and protected veterans.
